RTS Tactical was created to bring body armor and tactical gear with the highest standards to the market by having control over design, production, pricing, profitability, and branding.

At RTS Tactical, we design, engineer, produce and provide world-class, top-of-the-line body armor and tactical gear. Our products are designed and manufactured using state-of-the-art-materials and technologies – setting a new standard for functionality, durability, and affordability.

After building a huge audience and building strong business relationships with some of the biggest influencers in our space we quickly realized what we have here. We have a strong following of consumers eagerly waiting for our new products to be released.

RTS TACTICAL AR500 LEVEL III

RTS TACTICAL AR500 NIJ 0101.06 LEVEL III INSERTS

The RTS Tactical AR500 Level III Inserts will mitigate the impact of an onslaught of high-velocity rifle rounds as well as absorb other blunt force trauma in an active shooter situation. These field-tested RTS Tactical steel armor plates are designed for effectiveness from common street threats far beyond the requirements of the NIJ Standard 0101.06 Level III. First responders and law-abiding citizens can confidently eliminate a threat knowing they are adequately armored.

AR500 LEVEL III INSERTS

10 X 12 FRONT AND BACK PLATES

- High-Velocity Rifle Ballistic Protection NIJ 0101.06 Level III
- Size: 10" x 12" SAPI Cut Single Curve
- Weight: 7.9 lbs
- Anti-Spall self sealing polyurea coating

6 X 8 SIDE PLATES

- High-Velocity Rifle Ballistic Protection NIJ 0101.06 Level III
- Size: 8" x 6" SAPI Cut Single Curve
- Weight: 3.95 lbs
- Anti-Spall self sealing polyurea coating

RTS TACTICAL AR600 LEVEL III+ SPECIAL THREAT INSERTS

Our AR600 Level III+ plates are designed to easily defend against an onslaught of incoming armor-piercing rounds as well the special threats specified in the highly sought after DEA armor protocol. In addition, we deploy our latest technology for an effective high-performance polyurea coating to bring you a superior spall containment when equipped with our build-up spall coating option to further reduce the deflection of projectile fragments.

These Level III+ AR600 plates have been through the toughest of tests beyond the velocities guided by the NIJ Standards to guarantee nothing but the best armor for our Civilians, Law Enforcement, First Responders, and all patriots with boots on the ground!

RTS TACTICAL CERAMIC LEVEL IV INSERTS

RTS TACTICAL CERAMIC NIJ 0101.06 LEVEL IV RIFLE PROTECTION PLATE INSERT

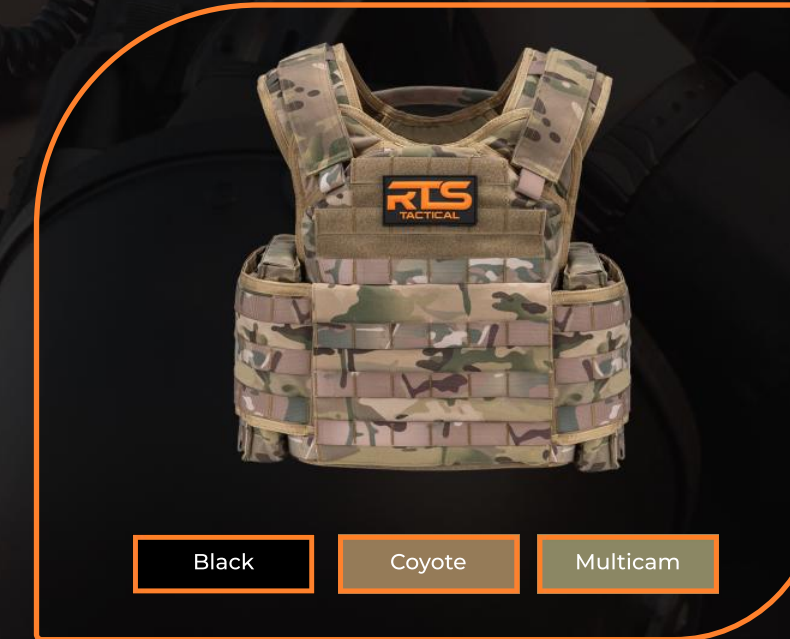

5.56mm ammunition designed for military use, with a steel or partial steel core, needs a ceramic or metallic component to the hard armor plate to stop it. Some Level III have a ceramic/metallic face, but not all.

From the National Institute of Justice (NIJ) website:

5.56mm ammunition designed for military use, with a steel or partial steel core, needs a ceramic or metallic component to the hard armor plate to stop it. Some Level III have a ceramic/metallic face, but not all. If you have identified the M855 or other similarly designed steel core ammunition as a potential threat, a Level IV plate is the best choice for protection.

RTS TACTICAL PLATE CARRIERS

RTS TACTICAL SLEEK CARRIER

The RTS Tactical Sleek Plate Carrier is designed for users looking for a low profile signature in a variety of environments while maintaining full active ballistic protection. Additionally, the elastic side construction will keep the Armor Inserts snug to the body while in motion. This makes for perfect deployment into covert operations or easy don and doff with a minimalist design

- Constructed with durable long-lasting elastics
- Body construction 500D Cordura
- Added Trama padding on the body side of the carrier.
- Fully adjustable shoulder and sides
- Can fit Soft Armor or Steel Hard Armor Inserts

RTS TACTICAL PREMIUM PLATE CARRIER

The RTS Tactical Premium Plate Carrier utilizes top-quality materials and advanced technologies to form the industries #1 Full System Premium Plate Carrier. Designed for full battle performance, this system will load balance your equipment you bring to the fight.

Our proven design has been widely reviewed and approved by our men and women with boots on the ground that demand nothing but the best gear available. First responders and law-abiding citizens can confidently gear up knowing they are adequately equipped.

- Upgraded shoulder support system that improves load distribution and comfort
- Fast and donning platform while operating in an active shooter/first responder situation
- Quick hook-and-loop fastener adjustments for the front, back, and shoulders
- Heavy-Duty Reinforced drag handle.
- Cumberbund included
- 3DX mesh sculpted internal lining and more.

RTS TACTICAL BALLISTIC SHIELDS

RTS TACTICAL SWAT BALLISTIC SHIELD NIJ LEVEL IIIA WITH VIEWPORT

Deploying the RTS TACTICAL Ballistic Shield is critical for effectively responding to an active shooter situation. Cleverly designed for accuracy and function, first responders, law enforcement and SWAT teams can eliminate a threat knowing they are shielded from harm

- NIJ Level IIIA 0108.01 multi-hit capacity
- Heavy duty triangle ambidextrous handles
- LED lighting system (optional)
- Size: 24" x 36"
- Weight: 15 LBS
- 4" x 10" viewport

RTS ACTIVE SHOOTER SWAT BALLISTIC SHIELD

Deploying the RTS TACTICAL Active Shooter SWAT Ballistic Shield is critical for effectively responding to an active shooter situation. Cleverly designed for accuracy and function, first responders can eliminate a threat knowing they are shielded from harm. The shield conforms to NIJ Level IIIA for ballistic protection against handguns, shotguns, blunt impact and flying fragments. It is also available upon request in Level III protection from high-velocity rifle rounds.

- NIJ 0101.08 Level IIIA or Level III protection
- Lightweight design for easy and rapid motion
- Shooting ports in horizontal or vertical positions
- Contoured shape for added protection
- LED light compatible
- Ballistic Material: Hybrid Composite and more
- Silhouette shape allows for firearm deployment on both shoulders

RTS TACTICAL BALLISTIC PANELS

RTS TACTICAL BALLISTIC ARMOR GLASS PANEL DIVIDER

We've entered times that protecting the ones we care about is definitely one of the highest priorities may it be your employees, family members office, department etc. That's why at RTS Tactical we've taken our initiative and went ahead to design and manufacture state of the art military grade Ballistic glass see-through Panels that can easily be taken relocated, moved around or placed wherever they are needed.

- Mil-Spec Ballistic Glass
- Free Standing Vertical Panels, Movable
- Stops an onslaught of high-velocity Rifle ammunition
- Low profile base with 4 heavy duty, lockable caster wheels
- Made in USA and complies with the Buy American Act
- Design incorporates a mechanism which allows two adjacent panels to be fixed together.
- Glass panels are clear and can be seen through.
- Panels have removable caster wheels to allow for mobility and more.

RTS TACTICAL BALLISTIC ARMOR SOLID PANEL DIVIDER

Our RTS Tactical Ballistic Armor Solid Panel Dividers can easily be taken and used for cubicles, to block entryways and windows, connect to a wall as a partition, or simply connect multiple partitions lengthwise to form a bulletproof wall, a perfect product for any open and public location. These panels are currently in and trusted by hundreds of military recruitment centers.

Like our RTS Tactical Ballistic Armor Glass Panel Dividers we went ahead constructed and developed our RTS Tactical Ballistic Armor Solid Panel Dividers, They come in both standard and customizable sizes and finishes.

- Advanced Armored Steel Core Panel
- NIJ 0101.06 Level III+ Special Threats Armor Piercing
- Free Standing Vertical Panels, Movable
- Stops an onslaught of high-velocity rifle ammunition
- Low profile base with 4 heavy duty, lockable caster wheels
- Steel frame with gaskets to ensure the longevity of use and more.
